List of Preprints . . . . .	10
List of seminars and colloquia . . . . .	18
List of all visitors in the year 1995 . . . . .	21

## General remarks

The directors of ESI changed. From the beginning of September 1995 onwards the director of ESI is Klaus Schmidt, and deputy director is Peter Michor. In thi year also fell the decision that ESI should change its location. It will occupy  $840m^2$ , half of the second floor, in Boltzmanngasse 9, A-1090 Wien. The new location is twice as large and nearer to the institutes of Theoretical Physics and Mathematics. A famous architect (proposed by the Minister of Science and Arts, Dr. Rudolf Scholten) is planning and supervising the adaptation of the site. We hope that ESI will be relocated in mid-1996.

In the first half of the year 1995 ESI was host to 216 visitors. There were 108 preprints contributed to the preprint series, many of them still belong to programs from 1994, and 89 seminar talks or ESI-Colloquia were given. A conference was organized in Vienna, on Complex Analysis, and ESI took part in the organization of two more conferences abroad. The program on condensed matter theory included 4 workshops of 2 weeks each.

15th Winter school on geometry and physics, January 14–21, 1995 Srni, Bohemian forest,  
Czech republic.

Noncommutative differential geometry, Czech Republic, Castle Třešt, May 7 – 13, 1995

Gibbs random fields and phase transitions; this program started with a small workshop with 26 participants in Churáňov (Czech Republic).

## Winter School in Geometry and Physics

The traditional winter school in geometry and physics which takes places for one week each January since 1980 in a picturesque village in the Czech parts of the Bohemian mountains will be a joint enterprise of the Czech society of mathematicians and physicists and ESI, from 1994 onwards. Usually there are proceedings, which are published as a supplement of the ‘Rendiconti Matematici di Palermo’. The first conference with ESI-participation was in the period January 15–22, 1994, the proceedings for it are in preparation. The second winter school took place in Srni, January 14–21, 1995, proceedings will be published again as a supplement of the ‘Rendiconti Matematici di Palermo’.

## ACTIVITIES IN 1995

### Two-dimensional quantum field theory

The lively developments in this field were reflected also in the continuation of this programme (which started in 1993 and had a continuation on a small scale in 1994). This time altogether ten visitors spent around two to four weeks at ESI.

The main subjects treated were Integrable Lattice Spin Models and Quantum Groups (Faddeev, Scheunert, Jurco, Kulish), Conformal Quantum Field Theory (Todorov, Niemi, Wipf) and Noncommutative Geometry (Coquereaux, Presnajder). For all three subjects, papers were delivered and seminars held. Some papers are still in preparation. During a one-day visit, Kuchar reported on the latest news concerning the Quantum Hall effect.

Quantum groups are still of great interest, and the recent developments around the reflection equation and applications to  $q$ -deformed Minkowski spaces were treated. The problem of quantizing the Liouville equation has been dealt with also.

New soluble models of conformal quantum field theory are obtained through the study of the Khizhnik-Zamolodchikov equation. Various versions of the WZNW-model led to a publication by the Bulgarian group.

We used the ideas of noncommutative geometry to obtain a cut-off procedure for quantum field theory. Scalar fields, gauge fields and spinor fields in two dimensions can be handled. Most surprisingly our method allows to handle supersymmetry without breaking it.

After finishing this project it is a pleasure for me to thank all people involved (visitors and staff) for providing an excellent atmosphere, so that scientific exchange on this high level was possible. Since four of our guests lectured this year also at the Schladming Winter school, the whole Austrian physics community, as well as 140 participants profit from the activity in Vienna.

H. Grosse

The following preprints were contributed in this program: [214], [217], [225], [233], [234], [244]

### Complex Analysis

Organized by F. Haslinger.

The activities of this program were spread over the months January, February and March 1995. The main topics were CR-manifolds and functions, geometric aspects of complex analysis, application of functional analysis to complex analysis and partial differential equations,  $\bar{\partial}$ -equations, Bergman and Szegő kernels.

Some colleagues stayed for a longer period at the ESI (Daryl Geller, Takeo Ohsawa, Peter Greiner, John Wermer, David Tartakoff) most of the participants concentrated their visit around the week Feb. 20 - Feb. 24, where a workshop took place with 20 interesting 45 minutes lectures (see the following list):

- B. Berndtsson, Sweden: Some problems connected with interpolation and sampling of analytic functions.
- J. Bros, France: Transformations of Fourier-Laplace type and related holomorphy domains on the complex hyperboloid.
- R. Dwilewicz, Canada: Type functions for CR manifolds.
- Ch. Epstein, IHES, France: A relative index for CR-structures.
- Laura Geatti, Italia: Complex symmetric spaces.
- D. Geller, USA: Partial differential equations on the Heisenberg group.
- P. C. Greiner, Canada: Hamiltonian mechanics and fundamental solutions for subelliptic operators.
- A. Iordan, France: Compactness of the Neumann operator for piece-wise smoothly bounded strictly pseudoconvex domains.
- M. Langenbruch, Deutschland: Splitting of the  $\bar{\partial}$ -complex.
- L. Lempert, USA: Algebraic approximations in analytic geometry.
- J. McNeal, USA: The Bergman and Szegő projections on convex domains.
- R. Meise, Deutschland: Extension and lacunas of solutions of linear partial differential equations.
- S. Momm, Deutschland: Partial differential equations for analytic functions on compact convex sets in  $\mathbb{C}^N$ .
- P. Müller, Austria: The Banachspace  $H^1(X, d, \mu)$  (isomorphic classification).

- T. Ohsawa, Japan: On the variation of the density and an application to interpolation problems.  
 H.S. Shapiro, Sweden: Partial differential equations and analytic continuation.  
 R. Szöke, Ungarn: Hypercomplex structures on the tangent bundles of hermitian symmetric spaces.  
 D. Tartakoff, USA: The smoothness of solutions to the  $\bar{\partial}$ -equation and applications.  
 H. Upmeier, Deutschland: Toeplitz operators and geometric quantization in several complex variables.  
 V. Văjăitu, Romania: On Levi  $q$ -convexity.  
 D. Vogt, Deutschland: Solution operators for linear partial differential operators of second order and fundamental solutions with support in a half space.  
 J. Wermer, USA: Interpolation bodies in  $\mathbb{C}^n$ .  
 There were many further informal seminars combining various special fields of the visitors.  
 Contributions to the ESI preprint series: [195], [199], [203], [215], [216], [232], [253]

## Noncommutative Differential Geometry

Organized by Alain Connes and Michel Dubois-Violette, local responsible P. Michor.  
 Central part of this program was a conference in the Czech Republic, in the castle of Třešt, May 8 – 13, which was organized by the Union of Czech Mathematicians and Physicists, the Erwin Schrödinger Institute of Mathematical Physics in Vienna, together with the Institute of Mathematics and Institute of Physics of Czech Academy of Sciences and the Faculty of Mathematics and Physics of Charles University. The most exciting event at the conference was a new noncommutative representation of the standard model by A. Connes, which restricts some of the free parameters more tightly than the old one. The program of this conference was as follows:

### PLenary Lectures:

- Chamseddine A.: Unification, gravity and supersymmetry in NG  
 Connes A.: Geometry from the spectral point of view  
 Coquereaux R.: Fractal triangular dissections, Jones algebras and NG  
 Doplicher S.: The small scale structure of spacetime, gravitational stability and quantum field theory  
 Dubois-Violette M.: Connections on certain classes of bimodules and reality conditions in NG  
 Gawedzki K.: Conformal field theory and NG  
 Karoubi M.: Algebres graduées mixtes  
 Kastler D.: Constraints of the standard model a la Connes-Lott  
 Kerner R.: Z-3 graded differential calculus and new gauge theories  
 Klimcik C.: NG and supersymmetry  
 Madore J.: Linear connections in NG  
 Michor P.: Derivation based constructions on central bimodules  
 Rieffel M.: Deformation quantization  
 Roberts J.: Physical and mathematical aspects of spacetime  
 Todorov I.: Non-commutative configuration space in WZNW model  
 Connes A.: Geometry from the spectral point of view, II

### AFTERNOON LECTURES:

- Bona Pavel: On Lie-Poisson structure on quantum states  
 Borowiec Andrzej: Constructive approach to non-commutative differential calculi  
 Brodzki Jacek: Supertraces and entire cyclic cohomology  
 Brzezinski Tomasz: Geometric aspects of the quantum group gauge theory  
 Cap Andreas: On twisted tensor products of algebras  
 Ferretti Gabriele: Schwinger terms and cohomology of pseudodifferential operators  
 Friedlander Leonid:  $L^2$  - analytic torsion and  $L^2$  - Reidemeister torsion  
 Gracia-Bondia J.M.: Connes' interpretation of the standard model and massive neutrinos  
 Iochum Bruno: Yang-Mills-Higgs versus Connes-Lott  
 Kalau Wolfgang: Supersymmetric Connes-Lott models  
 Kaviani Kamran: Chiral perturbation theory in the framework of NG  
 Kopf Tomas: The evolution of spacetime encode into a scalar field algebra  
 Lee Chang-Yeong: BRST and anti-BRST symmetry in noncommutative geometric gauge theory: matrix derivative approach  
 Martin C. P.: Quantum corrections and the stability of the ngc constraints on the parameters of the standard model  
 Presnajder Peter: Finite gauge model in non-commutative geometry  
 Schucker Thomas: Yang-Mills-Higgs versus Connes-Lott  
 Sitarz Andrzej: Problems with metric and linear connections in NG

### POSTERS:

- Drabant Bernhard: Quasitriangular structures in braided tensor categories  
 Le Roy Bertrand: Hypermatrices: a Z-3 graded matrix algebra

Lizzi Fedele: Noncommutative Lattices as Finite Approximation of Topological Spaces

Post Gerhard: Differential calculus on Universal Enveloping Algebras

Moreover there was scientific activity in ESI in the month of May, and the following preprints were contributed: [210], [228], [235], [269], [285], [290], [296], [299] (the authors of the last preprint were guests from the program on field theory).

## Field theory and differential geometry

Organized by Giuseppe Marmo and P. Michor, it took place from May 15 till July 31, 1995. The program developed along the following lines:

**Differential geometry and its applications.** Asorey, Ibort, Grabowski, Marmo, Michor, Perelomov, Simoni, Tulczyjew, Vilasi.

**Spectral Geometry and Torsion.** Burghelea, Friedlander. Their theory was explained in an interesting series of lectures.

**Infinite dimensional Lie algebras and Lie groups.** Borodin, Grabowski, Kirillov, Michor, Mickelsson, Rozhkovskaya. Here a very interesting series of lectures by A. Kirillov and infinite dimensional Lie algebras and their representations is to be mentioned. Borodin and Rozhkovskaya are young graduate student of A. A. Kirillov who were still in Moskau at the time of the program.

**Gauge theories and current algebras.** Langmann, Mickelsson, Rajeev, Stern, Vitale

**Finite approximations to quantum physics.** Balachandrian, Bimonte, Landi, Lizzi, Sparano, Teotonio-Sobrinho

The following preprints were contributed: [200], [218], [224], [229], [231], [236], [239], [240], [241], [242], [243], [245], [246], [247], [248], [254], [255], [256], [261], [277], [279], [282], [289], [293], [299].

## Geometry of nonlinear partial differential equations

In this small program, organized by Vinogradov, he and Krasil'shchik spent one month each at ESI. The following preprints were produced: [202], [257], [260],

## Gibbs random fields and phase transitions

**Organized by R. Dobrushin and R. Kotecký.**

The semester was overshadowed by the sad news of passing away of Roland L. Dobrushin (12th November 1995 in Moscow) who was the main organizer. Even though his deteriorating health did not allow him to come, many discussions were influenced by his recent proposals and his thinking.

First steps toward organizing a conference devoted to the memory of Roland L. Dobrushin next September in Vienna were made during the semester.

The following colleagues participated in the program of the semester in Vienna:

Marek Biskup (1 week), Anton Bovier (2), Lincoln Chayes (8), Filippo Cesi (2), Efim Dinaburg (6), Roberto Fernandez (2), Roman Kotecký (10), Christian Maes (4), Vadim Malyshev (2), Fabio Martinelli (3), Igor Melicherčík (1), Boris Nakhapetjan (8), Enzo Olivieri (3), Senya Shlosman (1), Daniel Ueltschi (2), Miloš Zahradník (8).

We started with a workshop in Churáňov (Czech Republic) attended by:

M. Biskup, C. Borgs, A. Bovier, L. Chayes, J.-D. Deuschel, E. Dinaburg, R. Fernández, F. Hollander, P. Holický, O. Hryniv, D. Ioffe, M. Janžura, P. Kotalík, R. Kotecký, P. Marchetti, A. Martin-Löf, J. Miękisz, S. Miracle-Solé, B. Nakhapetian, C. Pfister, J. Ruiz, F. Slanina, D. Ueltschi, A. van Enter, M. Winnink, M. Zahradník.

In addition to (and as an extension of) numerous seminars, several topics were discussed in small groups. Some discussions already lead to finishing a paper (three ESI preprints were issued during the semmester); a number of papers and preprints is under preparation.

Among the topics discussed were:

**Dobrushin's program for defining relative energies for weakly non-Gibbsian measures**

*C. Maes, L. Chayes, R. Kotecký, E. Olivieri, M. Zahradník*

A proposal made by R. Dobrushin at a workshop in Renkum (in September) has been discussed. Certain pathologies in transformations of Gibbs measures can be for some models treated analogously to the so called Griffiths' singularities in disordered systems.

**Kac Model**

*A. Bovier, M. Zahradník*

Low temperature phase of the  $d$ -dimensional Kac Model was discussed. The aim is to prove that the critical temperature  $T_c$  is greater or equal to  $1 - \gamma^x$  for some  $x > 0$  where  $\gamma$  is the inverse of the range of the interaction. The validity of the Peierls argument was investigated for these models.

**Ising model with alternating field**

*E. Olivieri, L. Chayes, M. Zahradník*

The problem of its low temperature phase diagram was almost solved. In general we are dealing with the structure of low temperature phases of two dimensional models whose contours do not satisfy the ordinary Peierls condition but a weaker property: the energy of such contours is the sum of the "corner energy" which has a high density and the "segment energy" having a small density. The possibility of extending the Pirogov-Sinai theory to these cases was established.

**The spin flip dynamics of disordered systems**

*F. Cesi, C. Maes, F. Martinelli, M. Zahradník*

We started working on the glassy dynamics for randomly diluted magnets. Both upper and lower bounds for the relaxation of the disordered system to equilibrium were derived.

**Diluted models with continuum spins**

*L. Chayes, R. Kotecký, S. Shlosman*

We discussed the existence of "entropic" intermediate phases for lattice models with continuous spin and annealed dilution.

**Intermediate phase for a continuum model**

*L. Chayes, R. Kotecký*

A continuum four component model of Widom-Rowlinson type with an Ashkin-Teller symmetry was discussed. This model has two phase transitions with four distinct phases at high fugacity and two distinct phases in an intermediate fugacity regime.

**A Potts model with transition between two disordered states**

*M. Biskup, L. Chayes, R. Kotecký*

We investigated a possibility to use reflection possibility for a class of random cluster models and an application to a particular class of Potts models.

**Pirogov-Sinai theory for quantum models**

*R. Fernández, R. Kotecký, D. Ueltschi, E. Dinanburg*

Different aspects of this problem were discussed including fermi and bose systems as well as corresponding degenerated models.

**Dynamics of non Hopfield neural networks**

*V. Malyshev*

General methods which were developped earlier for telecommunication networks were applied to neural networks introduced by M.Cottrell. Strong properties of the dynamics were proved: convergence to the patterns starting from noisy patterns.

Some other topics discussed:

**Lifshitz law for the life-time of a droplet in the low temperature Ising model** *L. Chayes, F. Martinelli*

**Asymptotical behaviour for 1D symmetric exclusion with moving boundaries** *O. Hryniv, L. Chayes*

**Invariant measures for 1D asymmetric exclusion process** *O. Hryniv, V. Malyshev*

**Mixing properties and limit theorems for random fields** *O. Hryniv, B. Nahapetian*

**The question of the completeness of the phase picture constructed by the P.S. theory** *M. Zahradník, I. Melicherčík*

**Generalized Gibbs distributions** *V. Malyshev, B. Nahapetian*

**Dynamics for Hopfield networks with Small Number of Patterns** *V. Malyshev, L. Pastur, M. Scherbina*

Roman Kotecký

Contributions to the ESI preprint series: [281], [283],

## Reaction-diffusion Equations in Biological Context

This program was run from September 1 to November 15, 1995, and used nine man-months. The local organizers were Karl Sigmund, Reinhard Bürger and Josef Hofbauer from the Institute of Mathematics, the visitors Pavol Brunovsky, Konstantin Mischaikov, Thomas Nagylaki and Vivian Hutson.

Reaction-diffusion equation have been studied (in the context of population genetics) since 1937, but only recently has one studied the effect of different diffusion rates (biological motivation: diffusion rates are evolutionary variables, and subject to selection). The central question discussed during the workshop was: if different diffusion rates carry no selective advantage per se (i.e. all have the same fitness) will there still be selection for some particular rate? We assume, for instance, a one-dimensional distribution of the population along an axis, and a carrying capacity which is not constant and can even be negative in some spots. Under the assumption of asexual replication, and only two different diffusion rates, it turned out that there was always selection for the smaller one. This could be proved analytically, using the theory of mtonon flows, even in the case of adding small mutation rates to the equation. For more than two rates, the result is probably true, but its proof has still a gap (even for the no mutation case). Considerable effort has been made to develop more sophisticated models including sexual replication, recombination, and drift. Among the problems still at an exploratory stage, we mention: what happens if there is a cost attached to diffusion rates that are too small, or too large? Is there a selective advantage for higher diffusion rates if the carrying capacity oscillates periodically?

Another center of gravity for the discussions was the theory of travelling waves for frequency-dependent selection. This can be studied using evolutionary games (more precisely, reaction-diffusion variants of the replicator equation). The bistable situation was of particular interest. It was shown that under certain circumstances bistable waves exist (with a change of sign for the velocity of the density of one of the two competing types). This was applied to the study of the iterated Prisoner's Dilemma, with special emphasis on the invasability of a population of defectors by strict retaliators.

It is expected that during the next few months, several papers will result from our collaboration.

In particular, Nagylaki is finishing a paper with the title 'Multinomial-sampling models for random genetic drift', and a further work by Brunovsky-Hofbauer and Nagylaki with the title: 'Convergence of Multilocus systems under weak epistasis or weak selection' is in preparation.

Karl Sigmund

## Condensed Matter Physics

In this program which is still runing at present almost 70 scientists visited the Erwin Schroedinger institute. In the year 1995 3 workshops were held. The first one in August

was about "Transport Phenomena and Chaos". The second one in September was devoted to the "Heisenberg and Hubbard Model" and the third one in October to "Singular Spectra". The first two workshops lasted two weeks each and the third one just one week. Up to now about 15 preprints were written by the participants of this special semester on "Condensed Matter Physics - Dynamics, Geometry and Spectral Theory." Since this activity is still going on until the end of February 1996 the final account will be given in the report this year.

Contributions to the ESI preprint series: [259], [264], [270], [271], [272], [275], [276], [280], [291], [294], [295], [297], [302]

## Semi-Classical Limits and Kinetic Equations

This was a small workshop, organized by C. Schmeisser as a preparation for a program for 1997, in the period November 27 - November 28, 1995. The following talks were presented:

- W. Thirring (Wien): Derivation of the Thomas-Fermi theory from the Schrödinger Equation
- T. Paul (Paris): Semiclassical methods using coherent states
- H. Narnhofer (Wien): Vlasov hydrodynamics for a quantum mechanical model
- A. Arnold (Berlin): The relaxation-time von Neumann-Poisson equation: existence, uniqueness, large time behaviour
- B. Perthame (Paris): Time Decay in Kinetic Equations, Relations with Schrödinger and Fluid Cases
- M. Pulvirenti (Roma): On the Enskog equation: Derivability from particle systems
- I. Gasser (Berlin): The classical limit of Hartree-Fock systems
- N. Mauser (Berlin): Wigner transforms and homogenization limits
- R. Illner (Victoria): Global weak solutions of the Boltzmann equation in a slab with stochastic boundary conditions
- F. Poupaard (Nice): Semiclassical limits and effective mass theorems
- P. Gérard (Paris): Wigner measures and Concentration Effects
- A. Unterreiter (Berlin): The stationary quantum drift-diffusion model
- C. Ringhofer (Tempe): Approximate equilibria of quantum mechanical systems and applications to quantum kinetic and quantum hydrodynamic models
- P. Degond (Toulouse): Macroscopic models for semi conductors
- A. Zwiglmayr (Wien): Convergence of moment expansions for the semiconductor Boltzmann equation

## Guests of Walter Thirring

Contributions to the ESI preprint series: [187], [199], [209], [220], [221], [222], [223], [226], [265], [267], [286], [287], [288], [292],

## Guests of Klaus Schmidt

Contributions to the ESI preprint series: [268], [273], [300], [301],

## Guest of Wolfgang Kummer

Existing treatments of  $2d$ -dimensional models largely ignore a careful study of global questions. During the first visit of Dr. Katanaev we showed that nonvanishing torsion may be eliminated in  $2d$ -dimensional models of gravity. The equivalent generalized dilation theory, nevertheless, acquires a 'geometric' justification by this procedure. The global structure of that theory is shown to be obtained by cutting Penrose diagrams of the theory with torsion. The resulting structures turn out to be much closer to the genuine Schwarzschild black hole of General Relativity ([278]).

During his second stay we prepared a paper (preliminary draft: 'On the completeness of the black hole singularity in  $2d$  dilaton theories, prep. TUW95-24). It critically analyses the properties of Witten's black hole in relation to the genuine one. All known soluble models in the presence of matter are found to differ crucially from the genuine black hole, a fact to be suspected already from qualitative differences, e.g. in the Hawking temperature.

W. Kummer

Contributions to the ESI preprint series: [252], [278].

## CONTINUATIONS OF ACTIVITIES FROM 1994

### Continuation Operator algebras

Contributions to the ESI preprint series: [204], [226], [267], [274].

### Continuation Schrödinger Operators

Contributions to the ESI preprint series: [190], [193], [262], [208], [211], [212], [237], [238], [249], [250], [258], [262], [263].

### Continuation Mathematical Relativity

Contributions to the ESI preprint series: [190], [266], [267], [206], [207], [251], [266],

### Continuation Quaternionic manifolds

Contributions to the ESI preprint series: [188], [191], [196], [197], [198], [205], [213], [219], [230], [247],

### Continuation Spinor - and twistor theory

Contributions to the ESI preprint series: [192], [194], [201], [219], [227], [284],

### List of Preprints

We try to keep track of the bibliographical data of the published versions of the preprints – this is incomplete and we are constantly updating it. Therefore we enclose the list of all preprints, not only those of 1994.

188. Fabio Podestà, Andrea Spiro, *Compact Quotients of Negatively Curved Riemannian Manifolds with Large Isometry Group* (1995), 6 pp..
189. G.I. Kuznetsov, S.S. Moskaliuk, Yu.F. Smirnov, *Graphical Theory of Representations of Orthogonal, Unitary and Symplectic Groups* (1995), 67 pp., Not available via anonymous FTP.
190. Piotr T. Chruściel, Nikolai S. Nadirashvili, *All Electro-Vacuum Majumdar-Papapetrou Space-Times with Nonsingular Black Holes*, Classical and Quantum Gravity **12** (1995), L17-L23.
191. Chand Devchand, Viktor Ogievetsky, *Self-Dual Supergravities* (1995), 14 pp..
192. Jarolím Bureš, *Special Invariant Operators I.* (1995), 19 pp..
193. Nikolai Nadirashvili, *Berger's Isoperimetric Problem and Minimal Immersions of Surfaces* (1995), 19 pp..
194. Andreas Čap, Jan Slovák, Vladimír Souček, *Invariant Operators on Manifolds with Almost Hermitian Symmetric Structures, II. Normal Cartan Connections* (1995), 15 pp..
195. Editor: Friedrich Haslinger, *Collection of Abstracts of all Lectures given at the Workshop on Complex Analysis, Vienna, February 20-24, 1995* (1995), 22 pp..
196. Evgenyi A. Ivanov, *On the Harmonic Superspace Geometry of (4,4) Supersymmetric Sigma Models with Torsion* (1995), 27 pp..
197. Piotr Z. Kobak, *Explicit Doubly-Hermitian Metrics* (1995), 6 pp..
198. Tadashi Taniguchi, *Isolation Phenomena for Quaternionic Yang-Mills Connections* (1995), 19 pp., Not available via anonymous FTP.
199. Takeo Ohsawa, *On the Interpolation Problem in the Bergmann-Fock Space with Parameters* (1995), 13 pp., Not available via anonymous FTP.
200. Andreas Kriegel, Peter W. Michor, *Regular Infinite Dimensional Lie Groups* (1995), 37 pp..
201. Michel Cahen, Simone Gutt, Andrzej Trautman, *Pin Structures and the Modified Dirac Operator* (1995), 20 pp..
202. Gabriele Vezzosi, Alexander M. Vinogradov, *On Higher Analogs of the de Rham Complex* (1995), 16 pp..

203. Vâjâitu Viorel, *Connecting Points in Irrducible Stein Spaces by Irreducible Analytic Curves* (1995), 10 pp..
204. Dénes Petz, Csaba Sudár, *Geometries of Quantum States* (1995), 16 pp..
205. Henrik Pedersen, Yat Sun Poon, Andrew Swann, *Einstein–Weyl Deformations and Submanifolds* (1995), 16 pp..
206. Mirta Iriondo, Edward Malec, Niall Ó Murchadha, *The Constant Mean Curvature Slices of Asymptotically Flat Spherical Spacetimes* (1995), 9 pp..
207. Edward Malec, Niall Ó Murchadha, *Trapped Surfaces in Cosmological Spacetimes* (1995), 15 pp..
208. Pavel Exner, *The Absence of the Absolutely Continuous Spectrum for  $\delta'$  Wannier–Stark Ladders* (1995), 11 pp..
209. Walter Thirring, *What are the Quantum Mechanical Lyapunov Exponents* (1995), 16 pp..
210. Michel Dubois–Violette, Peter W. Michor, *Connections on Central Bimodules*, J. Geometry and Physics.
211. Nikolai Nadirashvili, *Calabi's Problem on Bounded Minimal Surface* (1995), 5 pp..
212. Alexander V. Sobolev, *On the Lieb–Thirring Estimates for the Pauli Operator* (1995), 17 pp..
213. Krzysztof Galicki, Simon Salamon, *Betti Numbers of 3–Sasakian Manifolds* (1995), 22 pp..
214. Anton Yu. Alekseev, Volker Schomerus, *Representation Theory of Chern–Simons Observables* (1995), pp..
215. David S. Tartakoff, *Global (and Local) Analyticity for Second Order Operators Constructed from Rigid Vector Fields on Products of Tori* (1995), 10 pp..
216. David S. Tartakoff, *Local Analytic Hypoellipticity for  $D_x^2 + D_y^2 + (x^{2m} + y^{2n})D_t^2$*  (1995), 6 pp..
217. E. V. Damaskinsky, P. P. Kulish, M. A. Sokolov, *Gauss Decompositions for Quantum Groups and Supergroups* (1995), 26 pp..
218. Andriy Panasyuk, *The Local Structure of some Complex Poisson Brackets* (1995), 8 pp..
219. Th. Friedrich, I. Kath, A. Moroianu, U. Semmelmann, *On Nearly Parallel  $G_2$  structures* (1995), 30 pp..
220. N.A. Gromov, S.S. Moskaliuk, *Special Unitary Groups in Cayley–Klein Spaces* (1995), 21 pp., Not available via anonymous FTP.
221. N.A. Gromov, S.S. Moskaliuk, *Symplectic Groups in Cayley–Klein Spaces* (1995), 14 pp., Not available via anonymous FTP.
222. N.A. Gromov, S.S. Moskaliuk, *Special Orthogonal Groups in Cayley–Klein Spaces* (1995), 33 pp., Not available via anonymous FTP.
223. N.A. Gromov, S.S. Moskaliuk, *Classification of Transitions between Groups in Cayley–Klein Spaces and Kinematic Groups* (1995), 29 pp., Not available via anonymous FTP.
224. Janusz Grabowski, Paweł Urbański, *Tangent Lifts of Poisson and Related Structures*, J. Physics A: Math. Gen. **28** (1995), 6743–6777.
225. Anton Yu. Alekseev, Peter Schaller, Thomas Strobl, *The Topological  $G/G$  WZW Model in the Generalized Momentum Representation* (1995), 38 pp..
226. Nevena Ilieva, Heide Narnhofer, *A Fermi Field Algebra as Crossed Product* (1995), 20 pp..
227. Andreas Čap, Jan Slovák, *On Local Flatness of Manifolds with AHS–Structures* (1995), 7 pp..
228. G. Cammarata, R. Coquereaux, *Comments about Higgs Fields, Noncommutative Geometry and the Standard Model* (1995), 20 pp..
229. A. Stern, I. Yakushin, *Lie–Poisson Deformation of the Poincaré Algebra* (1995), 22 pp..
230. Dimitri V. Alekseevsky, Vincente Cortés, *Isometry Groups of Homogeneous Quaternionic Kähler Manifolds* (1995), 44 pp..
231. Lars Ernström, Toru Ohmoto, Shoji Yokura, *On Topological Radon Transforms* (1995), 17 pp..
232. Friedrich Haslinger, *Hardy Spaces on Model Domains* (1995), 5 pp..
233. Yassen S. Stanev, Ivan T. Todorov, *Monodromy Representations of the Mapping Class Group  $B_n$  for the  $su_2$  Knizhnik–Zamolodchikov Equation* (1995), 20 pp..
234. Paolo Furlan, Ludmil K. Hadjiivanov, Ivan T. Todorov, *Canonical Approach to the Quantum WZNW Model* (1995), 27 pp..
235. John Madore, *Linear Connections on Fuzzy Manifolds* (1995), 8 pp..
236. A. Ibort, J. Marín–Solano, *Cosotropic Regularization of Singular Lagrangians* (1995), 21 pp..
237. László Erdős, *Rayleigh–type Isoperimetric Inequality with a Homogeneous Magnetic Field* (1995), 14 pp..

 301. Klaus Schmidt, *Invariant Cocycles, Random Tilings and the Super-K and Strong Markov Properties* (1996), 11 pp..  
 302. Alexander Moroz, *Upper and Lower Bounds on the Partition Function of the Hofstadter Model* (1996), 9 pp..

## List of seminars and colloquia

- 17.01.1995, D. Geller: Partial differential equations on the Heisenberg group  
 28.02.1995, M. Katanaev: 2D gravity and classification of minimal surfaces with curvature and torsion  
 07.03.1995, D. Tartakoff: The smoothness of solutions to the -equation and applications  
 10.03.1995, M. Katanaev: 2D Supergravity with Torsion  
 13.03.1995, L. Faddeev: Discrete Heisenberg-Weyl group and modular group  
 14.03.1995, A. Niemi: On the Number of Periodic Classical Trajectories in a Hamiltonian System  
 14.03.1995, H. Upmeier: Complex Analysis, Symmetric domains and Berezin Quantization  
 16.03.1995, A. Wipf: 2d-Gauge Theories in finite Volumes  
 17.03.1995, F. Kuchar: A review of Quantum Hall Effect Experiments  
 22.03.1995, B. Jurco: Coherent States and the Method of Orbits for Quantum Groups  
 22.03.1995, P. Bizon: Harmonic maps between hyperspheres  
 29.03.1995, P. Kulish: Deformed Minkowski Space-Time and R-Matrix Formalism  
 30.03.1995, F. Kamber: The Seiberg - Witten - equation  
 25.04.1995, B. Davies: Pointwise bounds on the heat kernels associated with elliptic differential operator and difference operators  
 27.04.1995, N. Nadirashvili: Spectrum of Schrödinger operators and minimal surfaces  
 03.05.1995, A. Chamseddine: Chern-Simon actions in non-commutative geometry  
 04.05.1995, K. Gawedzki: No comments on the Seiberg-Witten equation  
 05.05.1995, J. Roberts: A theory of dimension  
 09.05.1995, M. Monastyrski: Topological Charges in Generalized Sigma-Models  
 16.05.1995, M. Rieffel: Quantum groups associated with Abelian subgroups  
 17.05.1995, G. Landi: Finite Quantum Physics and Noncommutative Geometry  
 18.05.1995, G. Sparano: Noncommutative lattices as approximations of topological spaces  
 19.05.1995, T. Masson: Linear Connections on Quantum Groups  
 23.05.1995, F. Lizzi: Inflation from Noncommutative Geometry  
 24.05.1995, A. Stern: Classical Deformation of the Poincaré Algebra  
 30.05.1995, A. Balachandran: Topology Change and Quantum Physics  
 01.06.1995, W. Tulczyjew: Constrained Systems: Integrability of Implicit Differential Equations  
 07.06.1995, W. Kucharz: Algebraic models of smooth manifolds  
 08.06.1995, P. Teotonio – Sobrinho: Identical Particles, Cobordism and Quantization Ambiguites  
 09.06.1995, J. Yngvason: Modulare Strukturen in der Quantenfeldtheorie und einige Anwendungen  
 12.06.1995, A. Kirillov: Infinite Dimensional Lie Algebras for Physics  
 13.06.1995, J. Yngvason: Ursache und Wirkung in Fermis Zwei-Atom-System

- 13.06.1995, A. Kirillov: Representation of finite triangular groups (combinatorial, number theoretical, and statistical aspects)
- 14.06.1995, M. Asorey: Monopoles and Nodes in Gauge Theories
- 20.06.1995, J. Mickelsson: Wodzicki residue, renormalization, and anomalies
- 22.06.1995, W. Thirring: How hot is the Sitter Universe
- 26.06.1995, S. Rajeev: Large N limit of the non abelian Thirring-model
- 27.06.1995, D. Burghelea: Topology based on Elementary von Neumann linear Algebra
- 28.06.1995, L. Friedlander: The Witten deformation of the deRham complex and Helffer-Sjöstrand analysis
- 29.06.1995, D. Burghelea: Report on Seiberg-Witten versus Gromov theory
- 04.07.1995, L. Friedlander: The Witten deformation of the deRham complex and Helffer-Sjöstrand analysis. Part II
- 05.07.1995, J. Niederle: Conformal Flat Spaces, their Applications and Classification
- 06.07.1995, D. Burghelea:  $L_2$  Analytic torsion equals  $L_2$  - Reidemeister torsion
- 07.07.1995, A. Ibort: Floer's symplectic homology groups and their applications
- 10.07.1995, A. Ibort: Floer's symplectic homology groups and their applications Part II
- 11.07.1995, A. Kirillov: Geometric approach to Representations of Infinite Dimensional Lie Algebras
- 12.07.1995, J. Grabowski: Tangent lifts of geometric structures
- 13.07.1995, L. Friedlander: Asymptotic methods for computing log det of elliptic operators
- 14.07.1995, P. Michor: Evolution equations on infinite dimensional Lie groups
- 17.07.1995, A. Kirillov: Geometric approach to Representations of Infinite Dimensional Lie Algebras Part II
- 18.07.1995, S. Rajeev: Young-Mills Theory and Free Algebras
- 21.07.1995, D. Burghelea: Torsion and Dynamics
- 24.07.1995, A. Kirillov: Geometric approach to Representations of Infinite Dimensional Lie Algebras Part III
- 26.07.1995, A. Borodin: Typical Jordan form of large triangular matrices
- 26.07.1995, N. A. Borodin: On the centers of  $U(gl(m,n))$  and  $U(Q(n))$
- 27.07.1995, A. Perelomov: On the completeness of some subsystems of q-deformed coherent states
- 18.09.1995, D. Burghelea: Topology of the free loop space of a compact Riemannian manifold and the geometry of varieties over finite fields
- 18.09.1995, Y. Maeda: Minimal orbits of Matrics
- 18.09.1995, M. Loss: Eigenvalues of the Magnetic Schrödinger Operator, the Stability of Matter, and a Bound on the Fine Structure Constant
- 18.09.1995, J. Yngvason: On the Second Law of Thermodynamics
- 21.09.1995, R. Burton: Ergodic Properties of Dimers
- 21.09.1995, J. Steif: Dynamical Percolation
- 26.09.1995, A. Vinogradov: Krasil'shchik's U-cohomology and the Schouten-Nijenhuis bracket in Secondary ("Quantized") Calculus
- 13.10.1995, R. Fernandez: Removing classical degeneracy by quantum perturbation
- 17.10.1995, E. Dinabourg: Pure point spectrum for the finite-difference operator with almost periodic coefficients
- 17.10.1995, T. Nagylaki: Models and approximation for random genetic drift
- 18.10.1995, S. Shlosman: About metastability in lattice models
- 18.10.1995, E. Olivieri: Low temperature dynamics for a class of stochastic Ising models
- 19.10.1995, J. Sjöstrand: Some functions spaces, possibly useful in problems of phase space tunneling
- 19.10.1995, F. Cessi: 2D Stochastic Ising model at  $T_f > T_c$  (I)
- 19.10.1995, F. Martinelli: 2D Stochastic Ising model at  $T_f > T_c$  (II)
- 20.10.1995, M. Shcherbina: Perturbative expansion for the Hopfield model
- 23.10.1995, V. Hutson: Singular Perturbations for Reaction-Diffusion Equations
- 24.10.1995, T. Nagylaki: Diffusion approximation for migration models in population genetics
- 24.10.1995, Y. Maeda: The Non-commutative 3-sphere and 2-sphere
- 25.10.1995, V. Malyshev: Dynamics in Non Hopfield neutral networks
- 07.11.1995, M. Zahradník: Low temperature cluster expansions and applications to "stratified" Gibbs states
- 08.11.1995, B. Nahapetian: Decay of Correlations and Strong Convexity of Pressure in General Lattice Systems with Vacuum
- 13.11.1995, V. De Smedt: Star product and quantification of the exact Poisson Lie groups (an analogue of the Nérovslavsky-Vlassov's method)
- 13.11.1995, P. Brunoovsky: The Morse-Smale property of reaction-diffusion equations on higher dimensional domains
- 27.11.1995, A. Kriegel: Germs of Smooth Manifolds on Closed Subsets Part I
- 28.11.1995, Y. Maeda: Deformation Quantization of Poisson Manifolds
- 29.11.1995, A. Kriegel: Germs of Smooth Manifolds on Closed Subsets Part II
- 04.12.1995, M. Umehara: An Inverse problem of the flux formulas
- 05.12.1995, K. Sigmund: Diffusion processes in population dynamics
- 12.12.1995, F. Ledrappier: Hölder structure at infinity in negative curvature
- 13.12.1995, J. Combes: Quantum Dynamics associated to unusual spectra
- 14.12.1995, F. Ledrappier: Hölder structure at infinity in negative curvature II

14.12.1995, P. Bizon: Critical behaviour in gravitational collapse

## List of all visitors in the year 1995

Abanov Alexandre, University of Chicago, James Franck Institute 5640 S.Ellis Ave., Chicago, IL 60637, USA, Condensed Matter Theory, 1995 08 18-1995 08 23 / HO2, 1995 08 31-1995 09 21 / HO2, Albanese Claudio, University of Toronto, claudio@galileo.erin.utoronto.ca, 633 Bay Street, M5G 2G4 Toronto, Canada Quantum Spin Systems, Condensed Matter Theory, 1995 08 26-1995 09 08 / HO2,

Alexeevski Dmitri, Moscow, Russia, daleksee@mpim-bonn.mpg.de, gen. Antonova 2-99, Moscow 117279, Russia, Differential Geometry, Lie Groups, Quaternionic Manifolds, 1995 11 06-1995 11 12 / MI,

Altshuler Boris, Massachusetts Institute of Technology, Dept. of Physics, 4 Independance Way, Princeton, NJ 08540, USA, 77 Massachusetts avenue, Cambridge, MA 02139, USA, bla@research.nj.nec.com, bla@mit.edu, Condensed Matter Theory, 1995 08 11-1995 09 09 / HO2,

Andersson Lars, Department of Mathematics S-10044 Stockholm, larsa@math.kth.se, 1995 08 13-1995 09 02 / AB,

Asorey Manuel, Universidad de Zaragoza, Departamento de Fisica Teórica 50009 Zaragoza, Spain, asorey@saturno.umzar.es, Differential Geometry and Classical Field Theory, 1995 06 05-1995 06 17 / MM,

Aubry Serge, CE Saclay F-91191 Gifsur – Yvette Cedex, aubry@bali.saclay.cea.fr, 1995 10 23-1995 11 10 / HO2, 1996 01 22-1996 02 02 / HO2,

Avron J., Dept. of Physics Haifa, Israel, AVRON@phys1.technion.ac.il, 13 Golda Meir St., Haifa, Israel Condensed Matter Theory, 1995 08 13-1995 08 26 / HO2,

Bach Volker, Fachbereich Mathematik MA 7-2 Straße des 17. Juni 136, D-10623 Berlin, bach@math.tu-berlin.de, Condensed Matter Theory, 1995 01 30-1995 02 01 / HO2, 1995 08 07-1995 08 08 / HO2, 1995 08 28-1995 09 09 / HO2, 1995 09 18-1995 09 19 / HO2,

Balachandran A. P., University, Physics Dept. Syracuse, N.Y. 13244-1130, USA, bal@suhep.phy.syr.edu, Differential Geometry and Classical Field Theory, 1995 05 14-1995 07 02 / MM,

Balean Robin, Dept. of Mathematics Armidale, NSW 2351 Australia, rbalean@neumann.une.edu.au, Non-linear PDES, 1995 01 09-1995 01 10 / AB,

Bares Pere – Anton, F-38042 Grenoble Cedex, pbares@gaston.ill.fr, Strongly Correlated Systems, 1995 08 27-1995 09 09 / HO2,

Bartnik Robert, University of New England, Department of Mathematics Armidale NSW 2357, Australia, robb@neumann.une.edu.au, 1995 01 09-1995 01 13 / THI / 16.762,- / 12.448,-

Bellissard Jean, Université Paul Sabatier, Laboratoire de Physique Quantique 118 Route de Narbonne, F-31062 Toulouse Cedex, jeanbel@irsamc2.ups-tlse.fr, Condensed Matter Theory, 1995 08 13-1995 09 01 / HO2,

Berndtsson Bo, Dept. of Mathematics S-412 96 Göteborg, bob@math.chalmers.se, 1995 02 19-1995 02 26 / HAS,

Bimonte Giuseppe, biemonte@ictp.trieste.it, 1995 05 25-1995 06 19 / MM,

Biskup Marek, Prague, Czech Republik, biskup@cucc.ruk.cuni.cz, Statistical Mechanics, 1995 11 10-1995 11 19 / DOB,

Bizoń Piotr, University Institute of Physics Cracow, Poland, bizon@thp1.if.uj.edu.pl, Mathematical Relativity, 1995 03 19-1995 03 25 / AB, 1995 12 10-1995 12 20 / AB,

Borodin Alexei, University Moscow, Leninskie Gory, MSU, Mech-Mat, 119899 Russia, Russia Differential Geometry and Classical Field Theory, 1995 07 03-1995 08 01 / MM / 19.500,- /,

Bovier Anton, D-10117 Berlin, bovier@wias-berlin.de, Statistical Mechanics, 1995 11 21-1995 12 02 / DOB,

Bros Jacques, Centre d'Etudes de Saclay ( C.E.A. ) 91191 Gif sur Yvette Cedex, France, bros@amoco.saclay.cea.fr, Complex Analysis, Quantum Field Theory, 1995 02 15-1995 02 25 / HAS,

Brunovský Pavel, University, Institute of Applied Mathematics, Faculty of Mathematics and Physics, Mlynská dolina, 84215 Bratislava, Slovakia, brunovsk@fmph.uniba.sk, Qualitative Theory of Differential Equations, 1995 09 01-1995 10 31 / SIG, 1995 11 13-1995 11 13 / SIG,

Buchholz Detlev Germany, Institut für Theoretische Physik II Luruper Chaussee 149, D-22761 Hamburg Hudenberg. 33, D-25497 Prisdorf Schrödinger Gastprofessour, 1995 03 13-1995 03 14 / THI,

Burghlea Dan, University, Department of Mathematics 231 W 18th Avenue, Columbus OH 43210 USA, burghlea@math.ohio-state.edu, Geometry, Topology, Analysis, 1995 06 06-1995 09 20 / MM,

Burton Robert M., University, Dept. of Mathematics Corvallis, OR 97331-6405, USA, burton@math.orst.edu, Ergodic Theory, 1995 09 05-1995 09 22 / SCH,

Buslaev Vladimir, University of St. Petersburg, Dept. of Mathematics Ulianov St. 1, Universitetskaya nab. 7/9, 198904 St. Petersburg, Russia, buslaev@snoopy.niif.sph.su, Spectral Theory, 1995 10 15-1995 11 13 / HO2,

Capocci M.S., University Aberdeen, Scotland, capocci@maths.cbdr.ac.uk, Mathematical Relativity, 1995 08 14-1995 08 17 / AB,

Cesi Filippo, Università di Roma " La Sapienza ", Dipartimento di Fisica, cesi@roma1.infn.it, Statistical Mechanics, 1995 10 12-1995 10 21 / DOB,

Chamseddine Ali, ETH – Hönggerberg CH-8093, Zürich, chams@itp.phys.ethz.ch, Non-commutative Geometry, 1995 05 01-1995 05 06 / MC, 1995 05 13-1995 05 31 / MC,

Chayes Lincoln, University of California, Dept. of Mathematics Los Angeles CA 90023 USA, lchayes@math.vcla.edu, Statistical Mechanics, 1995 09 29-1995 11 20 / DOB,

Choquard Philippe, Dept. of Physics EPFL CH-1015 Lausanne, choquard@eldpa.epfl.ch, Dynamical Systems, Statistical Mechanics, Ergodic Theory, 1995 02 28-1995 03 01 / NAR, 1996 01 22-1996 01 23 / CLS / 8.500,- /,  
 Chrusciel Piotr, University of Tours, Dep. de Mathematiques, Faculté des Sciences Parc de Grandmont, F-37200 Tours, chrusciel@univ-tours.fr, Mathematical Relativity, 1995 07 20-1995 07 30 / AB, 1995 08 10-1995 08 23 / AB, 1995 11 16-1995 11 25 / AB,  
 Combès Jean Michel, Université de Toulon, F-83130 La Garde, Mathematical Physics, Schrödinger Operators, 1995 12 06-1995 12 16 / HO2,  
 Connes Alain, I-91440 no 5 Irnpasse Carriere, F- 91310 Longpont sur Orge, Non-commutative geometry, 1995 05 01-1995 05 07 / MC,  
 Coquereaux Robert, F-13288 Luminy, Marseille, coque@cpt.univ-mrs.fr, Quantum Field Theory, 1995 03 13-1995 03 17 / GRO, 1995 05 13-1995 05 19 / MC,  
 Cornean Horia, Satu – Mare, 3900 Romania Condensed Matter Theory, 1995 08 07-1995 08 16 / HO2,  
 Csikós Balázs, University, Dept. of Geometry Rákóczi út. 5., H-1088 Budapest, Differential Geometry, Lie Groups, 1995 07 17-1995 07 30 / MM / 18.200,- /,  
 Davies E. Brian, Dept. of Mathematics London WC2R 2LS, U.K., udah210@kcl.ac.uk, Schrödinger Operators, Spectral Theory in Mathematical Physics, 1995 04 23-1995 04 30 / HO1,  
 De Smedt Virion, Campus Plaine, Service de Geometrie Differentielle CP 218, B-1050 Ixelles, vdesmedt@ulb.ac.be, Quantum Groups, Star Product, Poisson Manifolds, 1995 11 13-1995 11 15 / MI,  
 Del Rio Rafael, Admon No 20, Deleg. Alvaro Obregon, 01000 Mexico D.F., delrio@servidor.unam.mx, Spectral Theory of Operators, 1995 10 17-1995 10 31 / HO2,  
 Dinabourg Efim, 123810 Moscow, Russia, mitpan@adonis.iasnet.ru, Statistical Mechanics, Dynamical Systems, Gibbs random fields and phase transitions, 1995 09 26-1995 11 09 / DOB / 58.500,- /,  
 Dobrushin Roland, 103051 Moscow Russia, dobr@ippi.msk.su, dobr@cppi.ac.msk.su Varilova, apt. 162, Statistical Mechanics, 1995 01 01-1995 01 27 / DOB,  
 Doplicher Sergio, Università di Roma " La Sapienza ", Dipartimento di Matematica I-00185 Roma, serdopli@itcaspr.bitnet, Non-commutative Geometry, 1995 05 04-1995 05 07 / MC,  
 Dwilewicz Roman, University of Western Ontario, Dept. of Mathematics London, Ontario, Canada, NGA 5B7, rdwilwei@uwovax.uwo.ca, Complex Analysis, PDES, 1995 02 19-1995 02 25 / HAS,
